Dear Mr. Pai and Members of the FCC:

The internet is a public utility essential to contemporary living. Net neutrality is fundamentally important for small businesses, such as my own.

I strongly disapprove the FCC's proposal to dismantle net neutrality and Title II's robust oversight of Internet Service Providers.

I call upon you to preserve fair and equal access to internet resources and information. This is crucial for children, school students, families of every income level – anyone who wants to expand their knowledge or lot in life.

Cordially,

Helene Feldman, BA, SA, CMC
President
